

Learning Through Play ~ June

This is an easy snack any child will love! Apple rings with 'icing' made of greek yogurt or cream cheese topped with colourful sprinkles!

APPLE FRUIT "DONUTS"

This is definitely the time of year for flowers! Kids will enjoy creating a flower masterpiece out of a simple cardboard cut-out and then covering it in flowers. Simply poke holes in the cardboard and the children can push the stems through the hole to create their beautiful flower arrangement!

Happy Canada Day!

This year we will have much to celebrate as we near the end of this pandemic and head into a normal life again!

Create a wreath with the children using tissue paper and paper plates to hang up to mark this special day!

Looking for a safe rainy day activity? You can do in the living room and portable enough to take outdoors! Decorate some paper plates in colourful patterns, staple on a large popsicle stick and there's your racket. Blow up a small balloon or a foam ball and get ready to play some tennis!

All you need is some playdough and plastic bugs. Press small balls of playdough into disks and press the bugs into it leaving their print behind. They can then match up the bugs to the prints creating a bit of a puzzle for them to do! I'm certain they will want to find other items to fossilize as well!
